MINYOUNG AN, PhD

QUANTITATIVE SCIENTIST

Menlo Park, CA | (520) 339-7402 | minyan1@stanford.edu

Stanford postdoctoral fellow with a Sociology PhD and a Certificate in Computational Social Science. Methods span causal inference, longitudinal and multilevel modeling, Natural Language Processing, and mixed-methods research. Studies professional careers, migration, gender and labor-market inequality. Brings experience across policy institutes and universities, with policy technical reports and scholarly publications.

TECHNICAL & RESEARCH SKILLS

Quantitative methods: Causal inference; matching and weighting; regression; longitudinal and event-history analysis; multilevel modeling; subgroup and interaction analysis.

Text & qualitative methods: Natural language processing (NLP), including word embeddings; semi-structured interviews; thematic and archival content analysis; mixed-methods research.

Programming: Python (pandas, NumPy, NLTK), R, SQL, Stata.

Research design & data: Survey and cross-national research; data harmonization; measure construction; standardization; sensitivity analysis.

RESEARCH EXPERIENCE

Stanford University | Postdoctoral Fellow Jul 2025–Present

Walter H. Shorenstein Asia-Pacific Research Center | Freeman Spogli Institute for International Studies

- Lead longitudinal research on gender differences in return migration among U.S.-trained Korean PhDs, linking Survey of Doctorate Recipients data with national indicators of gender inequality.
- Construct multi-wave analysis datasets and apply event-history models and subgroup comparisons to examine how mobility patterns relate to individual and institutional characteristics.
- Conducted 13 in-depth interviews with U.S.-based Korean migrant scholars for a collaborative study of professional networks and cross-border knowledge exchange.

University of Arizona | Doctoral Research & Research Assistantships

Research assistantships, 2020–2024 | PhD completed June 2025

- **Medical career pathways (ongoing collaboration).** Analyze eight cohorts of medical-school graduates (AAMC Graduate Questionnaire, 2015–2022) to examine gender and social-origin differences in research training and career aspirations; distinguish financial resources from profession-specific family background.
- **Scientific communities and text analysis.** Coded researcher interview transcripts for an NSF CAREER-funded study of globalization and politics in science; the broader project combined qualitative analysis with NLP, including word embeddings.
- **Comparative research.** Harmonized U.S. and Korean population microdata; used matching, standardization, and regression-based sensitivity analyses to study gender differences in educational selectivity.
- **Multilevel modeling.** Examined international doctoral education in relation to individual characteristics and origin-country conditions.
- **Qualitative research.** Conducted 26 semi-structured interviews on gender expectations, resources, and migration decisions and developed a thematic coding framework. Also interviewed feminist activists in South Korea about artistic and aesthetic forms of activism.
- **Additional projects.** Research on gender and political identity (NSF-funded), art activism in Korea, healthcare inequality perceptions among U.S. Hispanic-Latinos, and housing and mortgage attitudes in Ukraine.

POLICY & EARLIER RESEARCH EXPERIENCE

Korea Institute for Health and Social Affairs | Researcher 2017–2018

- Coauthored five policy technical reports, including three published jointly with the Ministry of Health and Welfare.
- Reports addressed OECD and local-government social expenditure, charitable-giving statistics, performance-based welfare finance, and social capital, governance, and life satisfaction.

Korea Labor Institute | Research Assistant 2016–2017

Korean Sociological Association | Editorial Assistant 2014–2015

Korea Journal of Sociology

Ewha Womans University | Research Assistant 2013–2015

- Supported the Highroad Social Citizenship project, funded by the National Research Foundation of Korea.

EDUCATION & COMPUTATIONAL TRAINING

University of Arizona: PhD, Sociology, June 2025.

Certificate in Computational Social Science | 2021.

Ewha Womans University: MA, Sociology, August 2016.

Ewha Womans University — BA with Honors, 2013

Political Science and Scranton Honors Program (Society and Justice track); minor in Law.

IRIS summer training program: Invited participant, "Joining the Data Revolution: Big Data in Education and Social Science Research," ICPSR, University of Michigan, 2021.

SELECTED HONORS, TEACHING & SERVICE

Honors: Raymond V. Bowers Award for Outstanding Graduate Student Paper (2023); Graduate and Professional Student Council Research and Project Grant (2023).

Teaching: Instructor of record for three sociology courses; teaching assistant in Quantitative Reasoning in Sociology and Qualitative Analysis of Health Data.

Communication & service: Research presentations at American Sociological Association and Population Association of America meetings; departmental international student, recruitment, executive, and DEI committees.

Language: Korean (native).
